

PS-59 NEW YORK CITY
EEK ARCHITECTS. DESIGN DIRECTOR: RAYA ANI

The challenge was to preserve the building's original 1917 shell- part of a former hospital annex building, while accommodating the K-5 school's program. The building functioned as a nurses' residence before it was converted to a new program. PS 59 is the first school in New York City to achieve compliance with SCA's demanding set of sustainable design standards, making it the first public green school in New York City.

SETON HALL UNIVERSITY SOUTH ORANGE, NEW JERSEY
PERKINS + WILL. DESIGN DIRECTOR: RAYA ANI

The Science & Technology Center was renovated as part of the school's master plan to meet the science program's future growth. The 110,000 s.f. building engages the old lab building with the new addition in a seamless manner while providing research laboratories, teaching spaces, common areas and offices for the school's science department.

TSINGHUA SCHOOL OF FINE ARTS BEIJING, CHINA
PERKINS + WILL. DESIGN DIRECTOR: RAYA ANI

The project represents the University's vision of integrating the Arts and Sciences as part of the institution. The 650,000 S.F. Tsinghua school of arts houses workshops, classrooms, sketch halls, multi-function rooms, library and administration offices. The program is divided between two buildings, the public building and the student building. The classrooms are located on the north side with glass walls and skylights that bring the north light in, while the workshops are on the east and south sides of the building.
